Ripon | 07928 779341 | william.trehitt@outlook.com

Skills & Qualities

MS Office Suite
Proficient in python
Adept in C++
ISO/IEC 2700

Quick Independent learner
Leadership from volunteering
Proficient in all OS

Proficient in HTML & CSS
Experience in Zendesk
Adept at Sage 200 & Sage 50

Work Experience

R&J Yorkshires Finest | Financial Assistant | March 2025 – August 2025 (Gap Year)

There were two sides to my role: customer facing and financial. For the customer facing side I took calls which ranged from chefs placing orders for the restaurants we supplied; to helping them find the right products and personalising certain products until the chefs received exactly what they were after. I then used our in-house software to place the orders and communicate to our factory any special specifications.

For the financial side of my role, I managed invoice matching the products we purchased including requesting any credit notes from our suppliers. Alongside this, I processed the weekly direct debits and card payments for our customers keeping track and chasing those who hadn't paid.

During my time I also pioneered new systems and processes for my role to create an easier and more seamless system for the whole company, one of which led to fewer missed credit notes and an easier transfer of information between colleagues

Voucher Express | Temporary Corporate Sales Associate | October 2024 – December 2024

My main duty was to liaise with corporate clients using Zendesk to ascertain the products that best fit them, while promoting our in-house product, streamlining the process by gathering previous purchasing information to make it a stress-free seamless experience for the purchaser.

I then processed the orders using Sage 200 and setting up accounts while working to the ISO/IEC 27001 accreditation. In addition, I reached out to consumer clients on behalf of IKEA to retrieve missed information to supply compensation.

Booths | General Assistant | December 2022 – October 2024

Delivering a brilliant customer experience, recommending customers best options for their situation. Working on tills, handling cash requiring quick thinking for delivering change as well as managing my own time to get products worked at the same time. I also troubleshooted issues on tills.

Goonhilly Earth Station | Intern | July 2023

I spent a week learning the process the earth station uses to track satellites and communicate with them, such as methods of locating satellites, the equations used and databases in place. We did this all while building a presentation on Atmospheric rubbish which we presented to the CEO at the end.

Education

St. Aidan's & St. John Fisher Associated Sixth Form | A-Level | September 2022 – July 2024

Computer Science - C Created a maze generation and solving app using pygame, that uses multiple algorithms to display the process each uses.

Mathematics - D

Physics - E

Ripon Grammar School | GCSE | September 2020 – June 2022

Physics (Higher) - 8

Mathematics (Higher) - 7

Chemistry (Higher) – 6

English Language – 5

Biology (Higher) - 6

Astronomy – 5

Volunteer Experience

Scouting | Young Leader | September 2022 – July 2024

I helped lead my local scout group, by planning and undertaking sessions with other volunteers, directing them to best help me and helping the children with any issues they have in a manner that best suits them.
